Download macOS Find the appropriate download link in the upgrade instructions for each macOS version: macOS Catalina, macOS Mojave, or macOS High Sierra. Installers for each of these macOS versions download directly to your Applications folder as an app named Install macOS Catalina, Install macOS Mojave, or Install macOS High Sierra. 12.5 or later, or El Capitan 10.11.6 Enterprise administrators, please download from Apple, not a locally hosted software-update server. Currently, this feature is in an open beta phase. These advanced steps are primarily for system administrators and others who are familiar with the command line. Build your app's user interface via drag and drop then use our clear and powerful language to provide your app with its unique functionality. Create your Xojo account and download Xojo to get started developing your first app. Their promise doesn't end with a mobile app: in contrast to other app maker software they also let you create a responsive website that automatically syncs your app content. It's the perfect solution for posting info, products, links, etc to people who don't have the means or the time for an actual website. You don't need a bootable installer to upgrade macOS or reinstall macOS, but it can be useful when you want to install on multiple computers without downloading the installer each time. Important: To get the correct installer, download from a Mac that is using macOS Sierra 10. ae05505a44 [Gmi Target Packaging Program Website](#)
